# **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

General advice Get medical advice/attention if you feel unwell.

Never give anything by mouth to an unconscious person or a person

with cramps.

If inhaled Remove casualty to fresh air and keep warm and at rest. In case of ir-

regular breathing or respiratory arrest provide artificial respiration.

Commercial Product Name: MS1

In case of unconsciousness give nothing by mouth, place in recovery

position and seek medical advice.

In case of skin contact After contact with skin, take off immediately all contaminated cloth-

ing, and wash immediately with plenty of water and soap.

In case of eye contact In case of contact with eyes flush immediately with plenty of flowing

water for 10 to 15 minutes holding eyelids apart and consult an oph-

thalmologist.

If swallowed IF SWALLOWED: Do NOT induce vomiting. Give nothing to eat or drink.

Call a physician immediately.

#### 4.2 Most important symptoms and effects, both acute and delayed

eyes: Causes eye irritation. Symptoms

Skin: Causes skin irritation.

oral: Signs and symptoms of excessive exposure may be CNS eff ects

such as sleepiness and unconsciousness.

Acute toxicity: R36/37: Reizt die eyes und die Atmungsorgane.

## SECTION 5: Firefighting measures

## 5.1 Extinguishing media

Suitable extinguishing media Water spray jet, Dry extinguishing powder, alcohol resistant foam,

Carbon dioxide (CO2)

#### 5.2 Special hazards arising from the substance or mixture

Special exposure hazards arising Combustible by-products of carbon monoxide/dioxide. NOTES: from the substance or preparation itself, its combustion products, or released gases

Methyl methacrylate monomer may be released (CAS 80-62-6) when

heated above 200 °C (392 °F).

## 5.3 Advice for firefighters

Additional information on fire-

fighting

Wear a self-contained breathing apparatus and chemical protective clothing. Cool closed containers that are near the source of the fire.

For small bottle: Smother with water, wet blanket or towel. Vapours can travel considerable distances to a source of ignition where they can ignite, flash back, or explode. In use, may form flam-

mable/explosive vapour-air mixture.

# **SECTION 6: Accidental release measures**

## 6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions Wear personal protection equipment (refer to section 8).

Commercial Product Name: MS1

## 6.2 Environmental precautions

Environmental precautions Absorb liquid and place in sealed container for disposal.

Do not allow to enter into surface water or drains. Wash hands before eating, drinking or smoking. Wash contaminated clothing prior to re-use.

Handling larger quantities: Remove all sources of ignition. Use only spark proof tools. Absorb with liquid-binding material (e.g. sand, diatomaceous earth, acid- or universal binding agents). Vapours can travel considerable distances to a source of ignition where they can

ignite, flash back, or explode.

## 6.3 Methods and material for containment and cleaning up

Methods for cleaning up Clear spills immediately.Remove all sources of ignition. Remove per-

sons to safety. Ventilate affected area. Special danger of slipping by leaking/spilling product. Absorb with liquid-binding material (e.g. sand, diatomaceous earth, acid- or universal binding agents). Do not

breathe vapour/aerosol.

Dispose of waste according to applicable legislation.

Remove all sources of ignition.

Wipe up with absorbent material (eg. cloth, fleece).

# **SECTION 7: Handling and storage**

#### 7.1 Precautions for safe handling

Advice on safe handling Provide for sufficient ventilation, particularly in closed rooms.

Avoid contact with eyes and skin.

Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and any vapor below occupational exposure lim-

its suitable respiratory protection must be worn.

Keep cool. Protect from sunlight. Remove all sources of ignition.

#### 7.2 Conditions for safe storage, including any incompatibilities

Storage space and container re- Handle containers caref

quirements

Handle containers carefully to prevent damage and spillage.

Hints on storage assembly Keep away from strong acids, strong bases and strong oxidizing

agents to avoid exothermic reactions.

Storage specifications Store at temperatures not exceeding 38 °C/100 °F.

## 8.2 Exposure controls

Respiratory protection If workplace exposure limits are exceeded, a respiration protection

approved for this particular job must be worn.

Hand protection Wear protective gloves.

Suitable material CR (polychloroprene, chloroprene rubber)

Unsuitable material PVC or rubber gloves are not recommended.

Eye protection Wear eye glasses with side protection according to EN 166.

Skin and body protection Avoid contact with skin.

Wash contaminated clothing before reuse.

General protective and hygiene

measures

Provide for sufficient ventilation, particularly in closed rooms.

Minimise exposure using measures such as closed systems, dedicated

facilities and suitable general/local exhaust ventilation.

In case of inadequate ventilation wear respiratory protection.

Usual hygienic measures ofr dental practice and dental laboratories.

Provide adequate ventilation. Where reasonably practicable this **Engineering measures** 

> should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and any vapor below occupational exposure lim-

its suitable respiratory protection must be worn.

Other information (chapter 8.) Wash hands before eating, drinking or smoking.

Wash contaminated clothing prior to re-use.

9.2 Other information

Other data No further relevant information available.

# SECTION 10: Stability and reactivity

10.1 Reactivity

Reactivity Hazardous Polymerization will not occur.

10.2 Chemical stability

Chemical stability The product is stable under storage at normal ambient temperatures.

10.3 Possibility of hazardous reactions

Hazardous reactions No hazardous reaction when handled and stored according to provi-

sions.

10.4 Conditions to avoid

Conditions to avoid Keep away from sources of ignition. When not in use, keep containers

tightly closed.

10.5 Incompatible materials

Materials to avoid Keep away from strong acids, strong bases and strong oxidizing

agents to avoid exothermic reactions.

10.6 Hazardous decomposition products

Hazardous decomposition prod-

ucts

carbon dioxide, carbon monoxide. Hazardous decomposition byprod-

ucts may form with exposure to high temperatures.
